Mike,

Attached are revised files for the above referenced data set. I am providing 4 files for this data set. (1) The revised validation memorandum includes a discussion on blank correcting the sample results. (2) A supplemental file in Excel format (referenced in the memo) that includes the Net Concentration and the Net Concentration Propagated Error values. (3) A revised version of the original lab EDD that includes all results and calculated values. (4) A copy of the chain of custody that corresponds to the data.

I have published this data to Scribe. I was not sure which result needed to be in Scribe. I entered three results – the original result as reported by the lab, the validated result (from the original submission) that is not blank corrected; and the blank corrected result. I also added the Net Concentration Propagated Error. If any of this information needs to be changed/added/removed, please let me know.

The complete laboratory deliverable (which includes all supporting documentation) is available upon request.

If you have any questions, please let me know.

Thanks,
Kristie
